

Ruitong Liu

AIGC Creative Production Specialist | AI Visual Content Production | Global Growth Creatives

Beijing | 18010019882 | m13126880852@163.com
Target Role: Creative Production Specialist

Professional Profile

B.A. in Advertising with hands-on experience in commercial AIGC visual content and overseas short-drama production. Currently involved in Western-character short dramas, brand campaign materials, poster/KV assets, social media covers, video creatives, and Wawo AI platform testing. Familiar with the full production workflow from creative breakdown, AI asset generation, video generation, editing, iteration, quality review, to final delivery. Strong at turning complex creative requirements into repeatable, scalable AI-assisted workflows for product demos, growth ads, social videos, English dialogue/subtitles, and multi-language content localization.

Core Strengths

AI Creative Production	AI image/video generation, product-demo visualization, poster/KV materials, social covers, short-form video assets, character/environment/prop assets, and multi-version creative outputs.
Workflow & Automation	Prompt templates, negative prompts, asset naming, version control, revision logs, quality-check standards, SOP documentation, and scalable delivery for frequent iteration.
Growth Creative Mindset	Understands that ad creatives must serve clicks, retention, conversion, and user comprehension; able to iterate hooks, subtitles, pacing, selling points, and visual style.
English & Global Content	CET-6; experienced with Western-character projects, English dialogue checks, subtitle/copy drafts, overseas short-drama aesthetics, and AI-assisted localization workflows.
3D AI Tool Exploration	Exploring Meshy, Blender, GLB/FBX, and Godot workflows for AI-generated 3D assets and interactive demos; able to summarize creator pain points and product storytelling angles.

Work Experience

Dreame Technology | AIGC Content Production / Overseas Short-Drama Production / AI Creative Production Support 2026.01 - Present

- Participated in multiple Western-character overseas short-drama and brand campaign projects across romance, fantasy revenge, and urban comeback genres; delivered AIGC visual assets, video shots, poster/covers, campaign materials, and revision outputs.
- Worked across the AI content production pipeline: script/brief understanding, visual breakdown, character/environment/prop asset planning, AI image generation, AI video generation, CapCut rough edits, shot revisions, version management, and file archiving.
- Focused on character consistency, shot continuity, reverse-angle spatial logic, blocking, prop versions, lighting quality, dialogue attribution, and action continuity to reduce unusable assets and repeated rework.
- Built and optimized workflows across Seedance 2.0, Tapnow, Kling, and related tools; documented prompt standards, negative prompts, multimodal generation methods, asset naming rules, and revision logs to improve output efficiency and delivery stability.
- Produced 1,500s+ of video materials, 20+ core environment assets, 60+ AIGC character/environment/prop assets, multiple poster PSD/JPG versions, social covers, and AI IP visual materials.
- Participated in Wawo AI internal platform testing, workflow validation, demo recording, and requirement feedback; evaluated generation links, user experience, and business applicability from real production scenarios.

Three Squirrels? / Tensyn Media Group Co., Ltd. | Business Operations & Commercial Planning 2025.03 - 2025.09

- Supported business planning, marketing pitch scripts, and response documents for clients in telecom, banking, and healthcare; translated client briefs into communication objectives, content priorities, and delivery requirements.
- Participated in proposal writing, on-site presentations, and cross-functional collaboration; introduced an AIGC-assisted content workflow to create project demo videos and turn complex business information into clear visual presentation materials.

Xinmei Xingkong (Beijing) Digital Technology Co., Ltd. | Account Executive & Sales Support 2024.06 - 2024.12

- Handled client communication, project execution, document organization, content material support, and sales coordination; gained practical experience in agency-side project follow-up, requirement feedback, execution, delivery, and cross-team communication.
- Contributed to brand content, copywriting, and visual material support, strengthening creative execution and commercial content understanding in advertising projects.

Selected Projects / Portfolio Directions

- Blood Covenant - Overseas Short-Drama Visual Materials** | AIGC poster/KV, social cover, video revision, project review
- Participated in poster, social cover, core environment asset, and episode-video production for a fantasy revenge vampire short drama; created commercial visuals around dark fantasy, revenge, and vampire themes.
 - Supported delivery of multiple PSD/JPG versions and iterated composition, characters, lighting, title area, atmosphere, and layout based on buyer and campaign feedback.
 - Documented project learnings around style control, platform differences, prompt iteration, asset reuse, and revision workflow, which can be transferred to AI product demos and scalable ad-creative production.
- Picking Up a Mafia Boss - Batch Visual Asset Production** | Environment/character/prop assets, consistency control, multi-episode delivery
- Participated in batch generation and revision of environment, character, and prop assets for an overseas urban romance short drama, supporting later video generation, shot revisions, and promotional materials.
 - Handled spatial contrasts such as luxury mansion, working-class home, and alley environments while maintaining reverse-angle consistency, blocking, furniture/prop logic, lighting direction, and episode continuity.
 - Improved multi-project asset reuse and revision accuracy through reference anchoring, prompt templates, asset naming, and change records.
- Wawo AI Internal Platform - Real Production Workflow Validation** | AI platform testing, demo recording, frontline feedback
- Participated in internal AI platform testing, demo recording, and requirement feedback; validated tool applicability through real short-drama production workflows.
 - Summarized issues from generation quality, operation flow, user experience, visual consistency, credit consumption, and revision cost to provide frontline feedback for product and technical teams.
- Meshy / Blender / Godot 3D Desktop Pet Experiment** | AI 3D asset-to-interactive-demo workflow, in progress
- Used Meshy to generate a realistic cat 3D model and explored GLB/FBX/Blend imports, material checks, format organization, and interactive application integration through Blender and Godot.
 - Focused on practical creator pain points in AI 3D asset implementation, including texture retention, model scale, polygon optimization, material loss, rigging/animation integration, engine compatibility, and desktop app packaging.
 - The project can be expanded into Meshy-style product demos, tutorial videos, creator case studies, social videos, and AI 3D tool marketing content.
